USE TVI RETREAT
Sponsored by
HILL-MONT MOBILE RADIO CLUB

MEET MEETING: Cataldy School, East Entrance, between 65th and 65th on Lansdowne Ave.
First Monday of the month, November 3, at 2000.

← REFRESHMENTS AND DOOR PRIZES:

← November meeting - QQH will talk on vertical antennas for 10 mtrs.
Also an interesting movie - Radio at War.

December meeting - Mr. S. Kollars, W2HWN will talk and show slides
on the electron microscope.

THE LATEST SCOOP:

W3QPL joined our ranks last meeting. Herb has been attending regularly
and has already taken active interest in the club. His rig at home is
the old reliable Mark II - who has a good mobile rig to offer him at a
reasonable price.

W3QHK has offered to represent us at the Council of Clubs. W2NBJ is
back from honeymooning without ill affects and began married life by
winning the August transmitter hunt. JCTT was a close second. Tough
part in, they now have to plan the next one scheduled for Sunday,
December 7 - 1300 hours. First prize on August hunt was a \$16 Shure
hand mike. Second fiddle got 6 months paid up dues. Prizes for the
December hunt to be announced. Those interested in DF equipment of the
ham variety might look up PWD, AAG and JLE - what did they say? 2 degrees
at 10 miles.. NIP left his dipole in Reading - his last stop before CRT.
JHT looks pretty sporty in his new Nash. Expects to have an Elmac
installed soon with a Morrow-converter a distinct possibility.
This rag would like to thank NIP for his most interesting talk on a
subject usually considered dry and barren - the resistor. Since time
did not allow, Chuck will talk later on the capacitor which he says has
much more to offer. Ed didn't know Chuck was a poet - to wit: "HAD SCREW"
etc. for a quibble at the resistor color code.

W3QJ proudly reports FCC OK on his last radio telephone ticket. We have
remind any Class B ops that December 31, 1952 is last date for "A" ticket
class - one year "B" service required - get it while you can.

Another noise elimination sheet forthcoming at this meeting. Many thanks
are due JHYU for his efforts on this noise rag. His down-to-earth
approach and dry humor make a big problem seem easy. Attend this meeting
and get your copy.

JEM is now monitoring Bucks Co. CD net at 28650 - which brings up the
subject of club monitors. QQH notes that all VVS had to do is push the
button and clear his throat - bingo QSO. It is noteworthy to have mention
present monitoring stations. QQH-4-11 pm, VVS 8-12 pm, QV-6-10 PM, KOG and
QY - any time they're home. Ed would like to note that these stations
are all in one locality. Would like someone in West Phila. or Haverford
area. Scratch note - AAG now monitoring net freq. 4-8 pm.

Plans for the Lansdale Mardi Gras parade, November 25 at 6 pm have been announced. This is our 3rd year on this project and we've been so well received that the Jr. Chamber of Commerce didn't even ask us - they just assumed we were coming. This venture nets us a sizeable contribution to the treasury. 5 Mobiles so far - more can be used. But please note - LANSDALE IS A RAT RACE AFTER 6 pm, SO GET THERE AS SOON AS YOU CAN. WJHQZ is net control on 29493. 3AAQ had Oct. mid-month meeting with 15 attending. Largest yet with Mrs. AAO and Mrs. PMD serving coffee and cake. Mrs. Dickinson is looking fine after her bout with the sawbones. Next mid-month meeting at 3CTT's 1451 69th Ave., Oak Lane, one block west of Broad St. on November 19th, Wednesday.

3IM came out of hiding for the last meeting. Jay is busy out of town these days. But he's keeping HQ hot with his gallon final that runs on one leg and feeds a garden hose out the back. We hear that the second final tube is only used to neutralize the good one. NIP has us all green with a new Morrow Converter and an Elmac transmitter. Don't forsake 29493, Chick. Just a note to say that NIP will also soon have complete dope on a 75mtr vertical - feeds the whole mast we hear.

The Ed misses the little surprise tid bits usually forthcoming from connections with the KILA. Send us all the dirt gals, new QTH is 200 Midland Rd. Springfield, Del Co. and is due for a viewing soon.

CQ has issued a feeler about an article on Phil-Mont for a coming issue. A good chance for publicity and financial remuneration. Any and all suggestions on content and makeup readily accepted. QQH will contact CQ for further details. It is also worth noting that our treasury has been near or over the three figure mark for several months. Ed attributes this to a combination of no rental fee for meeting place, a sharp lookout for resale gear and auctions, and hard work on the part of officers.

SCR is working on a rig to be hidden in a Martha Washington Desk just south of the dental chair and cleverly camouflaged to look like a set of false teeth. Who was it that said, "I'll build it for you, Carl?" 3CWNK assures us that we will have heat on the 3rd floor for winter meetings. We hope so - cause baby it's gonna get cold outside this winter.

Our blurb system needs greasing once again. Unless we can find someone to type the master ditto and get it to FYU, we will have to lay out cash on the barrel. I need three volunteers - You, You and You.

CUB has a Lysco 3-6AQ5a for sale.

RJE has a Stancor ST-203-A for \$45.

NOVEMBER MEETING SPECIAL Sale of parts and accessories from Philco surplus sale. Shure carbon mikes (\$16) for \$7, coax relays coax jumpers, suppressor kits, cables, cables, etc. Cash on the barrelhead. All sales final - NO AUCTION.

VOTE - VOTE - VOTE - First on November 4 for anyone you choose, but VOTE - secondly at the December 1 meeting for our Phil-Mont elections. Pick your candidates and nominate them - campaign if you like - but come out to the December meeting and express your choice.

W3PKY.
